

Seal-Tite WT

Seal-Tite WT Couplers are the latest innovation in pipe sealing technology from SpringSeal[®]. This patented system is a co-extruded polypropylene and thermoplastic elastomeric (TPE) meeting ASTM F477 requirements for rubber gaskets. The extruded ends are fused together and sent to the end user as a double ended bell coupler. This product has been recognized as a truly unique innovation in the drainage industry. Most common uses include repair couplers, coupling for plain end corrugated fittings, pipe couplers.

Features:

- Connects two manufacture's pipe together.
- Convert plan end fittings to silt tight and watertight fittings.
- Preferred by contractors over mastic field couplers.
